

Visualize. Improve. Sustain.

HEAT STRESS

Signage • Banners • Decals • And More!

(877) 523-4088

www.visualworkplaceinc.com

A silhouette of a construction worker wearing a hard hat, sitting on a horizontal steel beam. The worker is looking towards the left. In the background, there is a large, bright sun low on the horizon, creating a warm orange glow. Behind the worker, there are vertical and diagonal steel structures, possibly part of a building under construction.

The Visual Workplace design team will create a sign to communicate unique needs.

Visual communication is key to heat stress prevention

Visual Workplace supports heat stress prevention by providing visual management products to improve and sustain a safe, efficient work environment.

As a project or safety manager, meeting or exceeding quality standards on time and within budget is key. Organization and safety are two major components for maintaining deadlines and creating a safe work environment.

Visual communication tools are essential for operating efficiently, organizing supplies and keeping employees informed of dangers that may surround them at any turn.

PPE required signs can be displayed for both workers and visitors who may be inspecting codes or delivering supplies to keep the job moving.

To avoid accidents, decals can be used to display equipment certifications on hard hats to ensure the person using the equipment has been trained as an operator. A-Frame signs can be used to direct traffic to areas that are safe from hazards.

During hot weather, time is money. Lost time accidents, equipment failure and disorganization need to be avoided to keep the job on schedule. Visual Communication is a key component to reducing these time draining costs.

Sign Materials

Choose from a large selection of materials to meet specific needs.

Dry Erase Board Overlays – Magnetic and Non-Magnetic

- Magnetic or Non-Magnetic
- Printed on a thin, durable acrylic sheet with a frame that attaches to a dry erase board
- Graphics printed on back to eliminate fading

Self-Adhesive Vinyl Decal

- Peel and stick backing, flexible vinyl film (curved or flat surfaces)
- Outdoor durability: 2 to 4 years
- Apply to clean, dry, smooth surfaces

Plastic

- Lightweight, yet rigid and durable
- Rounded corners
- Indoor use

Aluminum

- Rounded corners
- Rust resistant
- Outdoor durability: 5 to 7 years

Banner/Fence Banner

- Outdoor use, durable
- Hemmed with grommets
- Various sizes available

Reflective Aluminum

- Engineer grade sheeting
- Standard .118-gauge aluminum composite
- Standard mounting holes and corner radii
- Meets DOT and MUTCD guidelines
- 10-year outdoor durability

PROJECT MANAGEMENT

Overlays & Dry Erase Boards

Project Management Done Right!

Improvement necessitates measuring performance against the standard. No more hand-made graphics! Printed dry erase boards and overlays assist the team with problem solving and comparing goals to actual performance.

Visual Workplace has many designs to choose from or will customize a design at no additional cost. Simply contact us, and the design team will create a design to meet specific needs.

Material Options

Magnetic Dry Erase Boards

Magnetic, frameless dry erase boards are durable .118" steel composite. Graphics are long lasting.

Non-Magnetic Dry Erase Boards

Non-magnetic, frameless dry erase boards are .118" acrylic, which offers excellent clarity, durability, and can be used as a dry erase surface.

Dry Erase Board Overlays – Magnetic and Non-Magnetic

- Magnetic or non-magnetic
- Printed on a thin, durable acrylic sheet with a frame that attaches to a dry erase board
- Graphics are printed on the backside

Lockout Tagout, Padlocks, Devices, Security Seals & Storage

**Comply with OSHA Regulations and
Keep Employees Safe by Making
Equipment Inoperable. LOCK IT OUT!**

Controlling hazardous energy with a Lockout/Tagout (LOTO) system is an important component of maintaining a safe work environment and protects employees from injury or death that could occur if equipment isn't safely turned off. Energy used to power mechanical, hydraulic, thermal, electrical, pneumatic, water and other systems needs to be locked out to stop the release of hazardous energy when performing equipment repairs and maintenance. A stored energy release can cause environmental hazards, catastrophic injuries and death.

Visual Workplace offers padlocks, lockout devices, tags, labels, hasps and other devices to support any LOTO system to maintain a safe work environment.

Benefits

- OSHA compliant
- Clearly communicates risk in the workplace
- Provides safety while performing maintenance
- Prevents injuries, damage and errors

Hasps

**Ideal Solution when Maintenance
Requires More than One Worker
on Locked Out Equipment**

Using Hasp devices is an easy and effective way to lock out main power switches and energy sources to avoid accidentally restarting machines during maintenance or service. If, for example, different work steps need to be carried out by different workers on the same machine, each can lock out the machine with a respective padlock (sold separately).

Only when maintenance is fully complete, the last worker takes off his or her padlock and releases the main switch.

Available in:

- Steel
- Steel (Interlocking Style)
- Aluminum
- Plastic

DESCRIPTION	ITEM #
Steel Hasp, 1" Diameter	57-2510-0315-623
Steel Hasp, 1.5" Diameter	57-2510-3502-623
Plastic Hasp, 1"	57-2512-5515-628

Cable Lockouts

Cable lockout devices are universally applicable, especially in cases where longer distances between two lockout points need to be bridged. These flexible cables, available in different lengths, simply wrap around lockout spots and are tightened with the lockout device.

- Bridge two lockout points
- Patented grip mechanism to secure the cable
- Retighten at any time, even when locked
- Flexible metal cable in 3", 6", 9", 15" lengths

Standard Cable Lockout

- Holds up to 6 padlocks

DESCRIPTION	ITEM #
Cable Lockout, Standard, 3-ft Cable	57-2574-5025-SD03
Cable Lockout, Standard, 6-ft Cable	57-2574-5025-SD06
