

Innovative Products That Deliver

Continuous Improvement

Cost-Saving Solutions

Sustainability

Shipping and Receiving

Visual Management is a key component of continuous improvement strategies. In shipping and receiving departments, visual controls can be used to communicate standards, process controls and safety requirements. Visual Management helps identify what is happening compared to what should be happening. Visual Workplace provides many tools to implement and sustain improvements and eliminate waste.

Utilize visual communications to reinforce safety and process standards. Color-code to direct priorities and support 5S methods. Install Virtual Safety Projectors to eliminate safety hazards between pedestrians and forklifts.

Customize it!

No minimum order quantities. You can change the message to suit your needs at no additional cost. Simply contact us and our design team will create a custom sign with your input.

5S Wet/Dry Tool Boards

Organization solution for everyday cleaning tools

Get your team excited about 5S and maintaining a clean workplace. Our 5S cleaning stations provide a designated location for every day cleaning tools in either a dry or wet environment. Eliminate time spent searching and reduce the replacement costs of cleaning tools that always seem to disappear.

- Choose from a variety of backgrounds and tool shadow colors
- Select a material that works best in your environment
- Hardware for hanging tools is included

Virtual Projectors

Virtual Safety Walkways

A highly visible, cost-effective alternative to conventional floor marking tape. Use to clearly define walkways, aisles and lanes. Reconfigure easily without surface preparation.

Virtual Safety Symbols

An ideal alternative to floor decals in high traffic areas to direct pedestrian traffic and keep employees safe. There is no wear and tear or replacement costs for decals that just won't stick.

Virtual Safety Signs

Display sign images that communicate safety requirements to keep employees safe. There is no need to prep the floor or replace torn decals.

Forklift Safety Lights

Designed to increase traffic safety in warehouses, loading docks and shipping/receiving areas. Forklift Safety Light projectors create a visual signal that can be used in loud areas where audible alarms cannot be heard easily.

Crane Safety Lights

Designed for the safety lighting of industrial cranes mounted at elevated heights in bright environments. Increase the safety of crane operators and employees in surrounding areas - especially in loud environments.
