

Innovative Products that Deliver

Continuous Improvement

Cost Savings Solutions

Sustainability

Pharmaceutical Manufacturing

Pharmaceutical manufacturing requires compliance with strict regulations from the Food and Drug Administration (FDA). The FDA monitors drug manufacturing companies to make sure they follow the Current Good Manufacturing Practice (CGMP) regulations to ensure that they will fall within the requirements for manufacturing methods, facility compliance and quality control for customer safety.

Cleanliness and organization are two fundamental elements used to maintain compliance. Visual Workplace has many tools to cater to your facility's needs to reinforce these attributes. Shadow-Mark will help you organize your tools, make cleaning supplies accessible

Visual Communications for Pharmaceutical Manufacturing

to all employees with Tool Shadow Boards, Foam Tool Organizers and 5S Cleaning Stations with optional color-coded cleaning tools.

Manufacturing production areas have many varying Personal Protective Equipment (PPE) requirements depending on which area of the facility you work within. Displaying them prominently with signs, Floor-Mark floor decals or more modern floor signs projected on the floor will limit contaminants and keep employees safe from harm. Floor-Mark tape is also a good way to create lines of demarcation for "do not pass without proper PPE" or direct traffic throughout your facility.

Visual Workplace will help you *Visualize* your goals, *Improve* your processes and *Sustain* a lean work environment.
