## **Projected Safety Signs**

Projected safety signage is ideal for high traffic areas where adhesive decals don't last. They don't wear off, are visible in any lighting and can be projected on most any surface. It requires an image projector and an image lens. The lens is placed inside the projector and can be easily changed. The high visibility attracts more attention because it is an active projection.

***Custom lens available!***

**Select the lens that projects the message that fits your application!**

**Choose from four different projector sizes:**

- > Weather and dustproof projectors for rough environments
- > No moving parts such as fans or motors
- > Ideal for dusty and wet industrial environments
- > LED Lamp Technology - Ten times more efficient than comparable halogen projectors

# Projected Safety Signs

**Custom lens available.**

*Projected Safety Signs are available in four options.*

No minimum order quantities.

**Custom** – Custom lens available. Print any graphic image or logo.
