## Digital Walkways

Clearly defined digital walkways to increase pedestrian safety within your facility

Our digital floor marking methods use either a high intensity, eye safe laser to project a line or a high-visibility LED projector to create a virtual walkway, aisles, or lanes on any surface, indoor or outdoor. They are easy to set up and require little maintenance since you won't need to replace/repair floor tape and paint.

- > Easy installation
- > Reconfigure spaces easily
- > Eliminates the need for repainting/retaping
- > Ultra Visibility
- > Smart triggered projection
