Continuous Improvement

Cost Savings Solutions

Sustainability

Aerospace Manufacturing

Aerospace is an industry built on quality and technology. Aircraft, Space Exploration vehicles and propulsion systems need to be manufactured with precision. Tool management and organization streamline processes for efficient manufacturing. Using Visual Communication tool shadow boards and foam tool organizers will ensure that you will have the tools need where and when you need them.

Tool shadows create accountability for tools involved in the manufacturing process. Visual Workplace Shadow-Mark is the solution to your tool shadow requirements. Standard designs for tool boards and cleaning supply stations can be utilized for general needs or we can design a custom tool board for your

Visual Communications for Aerospace Manufacturing

specific tools at no extra cost. There are also standard or customized vinyl peel and stick tool shadows if you have current boards created and need organization and asset accountability.

Foam tool organizers are an efficient way to organize tools stored on a desktop or in a drawer. The Foam tool organizers also follow the same path as the tool boards with standard designs or facility specific tool customization. The two types of options for the foam are a CNC cut design created by Visual Workplace or a DIY foam for you to cut your own shadows on site.

Visual Workplace will help you *Visualize* your goals, *Improve* your processes and *Sustain* a lean work environment.
