Virtual Safety Projectors

Virtual Safety Lines

Project a highly visible, indestructible, single-beam, wide line onto any surface. Eliminate the need for floor tape and paint by creating bright virtual aisles and lanes. Long lasting, Virtual Safety Line projectors offer a versatile and efficient way to mark floors where needs may change.

Virtual Safety Walkways

A highly visible, cost-effective alternative to conventional floor marking tape. Use to clearly define walkways, aisles and lanes and reconfigure easily without surface preparation.

Virtual Safety Symbols

An ideal alternative to floor decals in high traffic areas to direct pedestrian traffic and keep employees safe. There is no wear and tear or replacement costs for decals that just won't stick.

Virtual Safety Signs

Display sign images that communicate safety requirements to keep employees safe. There is no need to prep the floor or replace torn decals.

Forklift Safety Lights

Designed to increase traffic safety in warehouses, loading docks and shipping/receiving areas. Forklift Safety Light projectors create a visual signal that can be used in loud areas where audible alarms cannot be heard easily.

Crane Safety Lights

Designed for the safety lighting of industrial cranes mounted at elevated heights in bright environments. Increase the safety of crane operators and employees in surrounding areas - especially in loud environments.
