Visual Workplace
is a leading provider of innovative
visual communications that
deliver a platform of continuous
improvement and drive
sustainability across all industries.

Visual Communication is Key for Workplace Safety

Visual Workplace supports various industries by providing visual management products to improve and sustain a safe, efficient work environment.

Hazards exist in every workplace in many different forms: sharp edges, falling objects, flying sparks, chemicals, noise and a myriad of other potentially dangerous situations. The Occupational Safety and Health Administration (OSHA) requires that employers protect their employees from workplace hazards that can cause injury.

Visual Workplace is dedicated to help maintain a safe workplace environment by providing the visual awareness to reinforce safety standards in areas of concern for physical and health hazards. PPE required signs can be displayed for both workers and visitors who may be working, inspecting or delivering supplies to keep the job moving.

An effective way to identify workplace hazards is for knowledgeable and experienced workers to conduct routine safety and health inspections. The only way to know if potential hazards exist and if they are under control is to assess work processes directly. Visual Workplace can provide the visual communications for work areas to make the workplace safe and in compliance with OSHA standards.
