

LED Dock Lines

Industrial use LED projectors to guide vehicles safely into docks

The LED Dock Line projector system provides a highly visible line projection to assist drivers when backing trailers into terminal docks. Without assistance, injuries can occur, docks and trailers can become damaged and centering trailers can be time consuming.

LED Dock Lines are visible on all surfaces including water, mud, gravel and snow. They work best during morning, evening and night times.

The LED Dock Lines can be seen in a driver's wing mirrors upon approach to the dock lane and provide a visual indicator that the trailer is centered in the lane.

- Center trailer to docks while backing up
- Separate trailers
- Eliminate replacing painted lines or tape
- Reduce damage to trailers and dock
- Decrease time unloading and loading trailers

LED Dock Line Projector System

Image size:	8 ft. – 23.5 ft.
